

The graph illustrates the evolution of six metrics over five time points (T0 to T4). A vertical dashed line at T2 separates the initial phase from the stabilization phase. The top three metrics (Agent Role, Moderator, Personalization) show a sharp increase from T0 to T1 and then stabilize. The bottom three metrics (Popularity, Sustainability, and an unlabeled metric) show a sharp increase from T0 to T1 and then stabilize at lower levels. The unlabeled metric (green line with circles) shows the most significant growth, reaching the highest value by T4.

Metric	T0	T1	T2	T3	T4
Agent Role (Blue Triangles)	0.15	0.95	0.95	0.95	0.95
Moderator (Purple Circles)	0.15	0.95	0.95	0.95	0.95
Personalization (Yellow Circles)	0.15	0.95	0.95	0.95	0.95
Popularity (Blue Circles)	0.10	0.45	0.45	0.45	0.45
Sustainability (Green Squares)	0.10	0.45	0.45	0.45	0.45
Unlabeled (Green Circles)	0.10	0.45	0.45	0.45	0.45
